

BIG PUBLIC UTILITY MEN TO AID LOAN

Consolidated Gas Co. Will Enclose Liberty Folders With Its Bills.

CORLEY LEADS WORK

3,000 Patriotic Service Leaguers to Canvass Every Family in 19th District.

With the opening of the campaign for the distribution of the second Liberty Loan of 1917 less than a week away, the various patriotic organizations and business interests of this district yesterday began to line up for a vigorous campaign for the sale of the bonds. The most prominent of these interests to pledge support to the committee during the day was the public utility corporations, which have organized a special committee headed by George B. Corley, president of the Consolidated Gas Company.

Banded under Mr. Corley will be such associations and corporations as the National Electric Light Association, the American Gas Association, the National Gas Association, the Interborough Rapid Transit Company and the Third Avenue Railroad Company. This committee has already started work among stockholders, the Consolidated Gas Company having mailed with its dividend checks folders calling attention to the loan. This method also will be followed in mailing monthly bills to thousands of consumers of gas.

3,000 Members to Help.

The first civic organization to line up with the local committee also placed its services in the hands of the local bankers yesterday. This organization is the Patriotic Service League of 509 Fifth Avenue, consisting of 3,000 men and women. The league for the present will throw its strength into canvassing the Nineteenth Congressional District, where the majority of the members of the league live. This district includes Riverside Drive from 125th street to Eighty-sixth street and extends east to Central Park, then north to 110th street and east again to Fifth Avenue, ending at 125th street.

For the purposes of the coming campaign this district has been divided into 115 sections, with a chairman supervising the work in every community. At a meeting of the chairman, at which instructions for the Liberty bond subscription will be given, is to be held next Monday evening at the league's headquarters. The chairman will include the sending of campaigners in pairs to canvass every house in every block of the district.

As the campaign's opening comes nearer leading bankers in the financial district are becoming more and more optimistic regarding the outlook for the sale of the next loan. Yesterday Charles E. Sabin, president of the Guaranty Trust Company, issued the following statement regarding the next campaign: "The people of the United States have not fully awakened to their own great possibilities," said Mr. Sabin. "Every dollar invested in Liberty bonds will tend to develop those latent powers. A new Liberty Loan of the amount proposed can be floated with very little disturbing business. On the contrary, it should promote materially the prosperity of the entire country."

World's Safest Investment.

"Every one knows that United States Government bonds are the safest investment in the world. The proceeds from the sale of Liberty bonds will be expended in this country by our own Government and by the allied Governments to whom we are making loans. "The new Liberty Loan will exert a potent influence in stabilizing foreign exchange. It will strengthen and help to make secure the position of the American dollar, which today rules the money markets of the world. "The payment of the interest on and principal of the Liberty Loan will not impair the resources of the United States. The money will come from the annual income and production of the country, now estimated at \$60,000,000,000. The United States produces wheat and great increases in grain values are generating a prosperity which will be apparent first in the West and later throughout the entire United States. Food is the basic factor in determining the cost of production in practically all that humanity consumes. "In this connection it might be well to consider a recent invoice made of our economic resources, which disclosed some impressive facts. For instance, there are twice as many cattle and horses in the United States as in any other country, with a total value of live stock products of more than \$4,000,000,000. Our corn crop is ten times greater than that of any other country. While our wheat crop is not as large as we had hoped for, it is bigger than that of any rival. Our cotton output is more than half of the world's supply."

Twice as Much Coal as Britain.

"Our coal production is nearly half a billion tons annually, which is about twice that of Great Britain, our nearest competitor. Our oil production, of more than 300,000,000 barrels, is twice that of Russia, which ranks second. Our output of iron and steel is twice that of Germany, our nearest rival. We produce more copper than all the remainder of the world put together. "The balance of our exports over imports last year amounted to more than \$2,000,000,000. Our gold reserve of approximately \$2,000,000,000 is more than

one-third of the world's total. Our wealth is now more than \$2,000 for every man, woman and child in the country. Our railroad mileage is more than double that of all Europe. "The total wealth of Great Britain, France and Germany amounts to \$227,500,000,000. The national wealth of the United States aggregates \$250,000,000,000. A perusal of these facts certainly reassures even the most dubious as to our ability to absorb not only the second Liberty Loan but a third and fourth if necessary."

SUFF COMMITTEE VOTED BY HOUSE

Ballot Is 181 to 107 After Wilson Letter Favoring Move Is Cited.

WASHINGTON, Sept. 24.—Creation of a committee on woman suffrage was ordered by the House today by a vote of 181 to 107. The Ways and Means Committee will name the personnel of the new committee, which will assume charge of all suffrage bills, now handled by the strongly anti-suffrage Judiciary Committee.

Either Representative Baker of California or Representative Taylor of Colorado probably will be made chairman. Miss Rankin of Montana has been suggested, but as she is a Republican she is not likely to be named.

Creation of the committee, for which the suffragists long have contended, assures an early fight on the Susan B. Anthony suffrage amendment at the next session of Congress. Both suffragists and anti-suffragists may be anxious that the bill be reported, as each claims confidence of victory on the floor.

The anti-suffragists, headed by Chairman Webb of the Judiciary Committee made a hard fight today against the resolution. They maintained its adoption would be taken as an endorsement of White House picketing, and that it was unnecessary inasmuch as the Judiciary Committee planned to report the amendment resolution early in the next session.

Miss Rankin and Representative Poy, chairman of the Rules Committee, who opposed the resolution, made the principal speeches for it. Mr. Poy declared that President Wilson had written him urging the naming of the committee, and when Mr. Webb said he did not think the President ever had made such a statement Mr. Poy produced the letter. It was not read.

The Senate Suffrage Committee, which is inactive, has been organized several years. While the House was voting four of the Woman's party so-called pickets were arrested for displaying banners before the White House. They were released on bond to appear to-morrow.

JEWIS RAISE RELIEF FUND.

Yom Kippur Contribution Expected to Reach \$1,000,000.

Ten per cent. of every dollar contributed to Jewish War Relief, on the occasion of Yom Kippur, the Day of Atonement, which begins at sundown to-night, will be added to the fund by an anonymous giver. This announcement was made last night by the campaign committee of the American Jewish Relief Committee.

The committee, through every synagogue, is appealing for funds and it is hoped that New York's contribution at this time will be not less than \$1,000,000, so that the giver, whose name is withheld at his own request, will make a contribution of \$100,000, if the total amount is secured.

MYSTERY IN SOLDIER'S DEATH.

Military Escort Also Lacking at Funeral of Private Woerner.

The funeral of William Woerner, a private in Company A, Forty-seventh New York Infantry, who was mortally shot in East Radford, Va., last Wednesday night, took place yesterday from the home of his father at 203 Mary Avenue, Brooklyn. No details concerning the manner in which the soldier was killed were received by the family.

Contrary to the general custom there was no military escort to the National Cemetery where the internment took place, nor was there a firing squad at the grave. Woerner was 20 years old and had been a member of the regiment for two years.

National Security Co. Promotions.

William A. Thompson and Robert C. Carson have been appointed vice-presidents of the National Security Company. Mr. Thompson has been identified with the company for eleven years and has been head of its court bond department. Mr. Carson was formerly a division of the out of town contract department. William B. Joyce, president, announced also the appointment of Robert M. Nugent as an assistant secretary.

RECOUNT ON TO-DAY, BENNETT GAINS 203

Primary Vote Now Stands 392 in Favor of the Mayor.

HE MAY GET 64 MORE

Manhattan to Be Tabulated—Woods Will Remain, Says Mitchell.

Justice Cohan of the Supreme Court signed an order yesterday for an examination of all of the ballots cast in the recent Republican primaries, terms of the recount being agreed upon by Mayor Mitchell and William M. Bennett.

The vote now stands 392 in the Mayor's favor. The Board of Elections, tabulating returns from all boroughs outside Manhattan, added 201 votes to Bennett's total in Brooklyn and nine to his count in Richmond. The Mayor gained six in The Bronx and one in Queens. The net change subtracted 203 votes from the Mitchell plurality, which had been put at 595.

But that isn't final. Manhattan has yet to be tabulated. Unofficially it was whispered last night it would add sixty-four to the Mitchell plurality and make it 456.

Bennett's Attitude.

When A. S. Gilbert, representing the Mayor, appeared before Justice Cohan yesterday Hamilton McInnes, representing Mr. Bennett, was on hand and informed the court that his client was willing that an order for an examination should be entered. At the same time, however, Mr. Bennett through his attorney made it clear that he did not consider the Mayor's application broad enough to meet the issue. Mr. Bennett appeared to think that every ballot, and every slip and every stub of the election official should be examined.

The proceedings instigated by the Mayor were brought under section 88 of the election law, and Mr. Bennett laid stress on the fact that this section does not provide for a judicial review of the examination.

"I therefore reserve all my rights to begin proceedings under section 56 of the election law," said Mr. Bennett, "to declare myself to have received the majority of votes at said primary and to be the lawful and regularly nominated candidate of the Republican party for Mayor."

Justice Cohan's order provides that the examination shall be conducted by the Board of Elections, and that all ballots upon which the names of either of both of the candidates for the Republican nomination appeared shall be inspected, including void and protested ballots, "quarantined" ballots and stubs. The order stipulates that Mayor Mitchell must pay the cost of removing the 2,060 ballot boxes from the 2,060 election districts to the Board of Elections and back again.

Examination Begins To-day.

The examination of the ballots will begin this afternoon at 121 Worth street, a building owned by the city. Only one clerk and one tally clerk from the Board of Elections have been designated to examine the ballots, and there was much speculation yesterday as to the time it would require to examine all of the ballots. It was figured by some that the two clerks from the Board of Elections would examine 100 boxes a day, but even if they were able to do this, and there is considerable doubt on the point, it would then require twenty-one days.

A rumor that for a time caused considerable discussion in political circles yesterday, but which was quickly nipped by the Mayor, was to the effect that Arthur Woods, Police Commissioner, would resign soon. The Mayor attributed it to the Tammany press bureau, and said that if he is re-elected he intends to keep Commissioner Woods in office four years more.

Mayor Calls It False.

"That rumor is wholly and utterly false," said the Mayor. "Commissioner Woods has not tendered his resignation. He will remain Police Commissioner until the first of January, and if this administration is re-elected he will remain four years more."

"Now as a matter of fact one of the

conditions upon which I agreed to become a candidate again was that Arthur Woods would sacrifice his own comfort and continue as Police Commissioner for four years more in the event of my reelection."

"Did you receive his assurance that he would do this?" the Mayor was asked.

"I received his assurance that he would," was the reply.

Mayor Mitchell was pleased yesterday at the action of the Irish-American League in strongly endorsing his candidacy. The league unanimously adopted resolutions supporting the Mayor, and they were forwarded to the City Hall by Dr. Joseph P. Brennan, president of the league.

The Mayor received yesterday a warm letter of congratulation on his nomination from Myron T. Herrick, former Republican governor of Ohio and former Ambassador to France.

A delegation of negro voters called on the Mayor at City Hall yesterday and urged that the Mayor should take steps to remove the negro residents of the city which would be the Mayor's responsibility. James T. Alexander, who headed the delegation, told the Mayor that Tammany Hall is circulating literature among the negro residents of the city which states that the Mayor was born in the South and was against the colored man.

The Mayor assured the delegation that he was born in this city and that complaints of discrimination by any department under the Mayor's control would be immediately looked into. He informed the delegation that the Mayor would continue to receive the same fair treatment accorded them during the last four years.

Rallies for Hylan.

The Democratic Fusion Committee of 170 and the Business Men's League, which will conduct the Democratic campaign, began yesterday to arrange for meetings throughout the city at which supporters of Judge John F. Hylan are arranging three big non-partisan meetings in Brooklyn. There will be a rally of the labor men in the Brooklyn Labor Lyceum, a civic demonstration and a luncheon by the business men.

Charles L. Craig, candidate for Comptroller on the Democratic ticket, announced yesterday that he would make the West Side Improvement plan and the development of New York harbor two special features of his campaign. Representative Murray Hubert has agreed to manage the Craig campaign, and in a letter to the Representative yesterday Mr. Craig said:

"As you know, the Comptroller is chairman of the port and terminal committee of the Board of Estimate, and because of my deep interest in the matter of the harbor improvement, I expect to make that a special feature of my campaign, particularly in its relationship to the development of New York harbor."

Moreover, it is a genuine source of gratification that our mutual interest in the development of a public park and playground system affords an opportunity of realization by my election to the Board of Estimate."

Representative Hubert, in accepting the management of the Craig campaign, wrote:

"As soon as I am relieved of my legislative task I shall join you heartily, enthusiastically and energetically to help demonstrate to the people of our great city that the claim made by the Fusion propagandists that it has been the best administration New York has ever had is an intellectual opiate intended to lull the voter to sleep until power and privilege have fastened their talons upon the city for another four years."

Rear Admiral Stokes Better.

Rear Admiral Charles F. Stokes, U. S. N., retired, former Surgeon-General of the navy, and more recently medical director at the city retreat for drug addicts at Warwick, who is ill, has improved very slightly. It was announced yesterday at the office of the Board of Inebriety. An operation for abdominal trouble has been indefinitely postponed, because of his weakened heart condition. The Rear Admiral is at Briarcliff Manor.

Judge Putnam Has Resigned.

PORTLAND, Me., Sept. 24.—Judge William L. Putnam of this city has forwarded President Wilson his resignation as a Judge of the United States Circuit Court of Appeals. It was learned to-day. Judge Putnam, who is 82 years old, has been on the bench for a quarter of a century.

Wool's higher'n a kite!

But what's the use of worrying when there's so much else to fret about? And besides, at the very worst, it can't possibly affect prices before the Winter of 1918—at least, not so far as you or we are concerned.

Meantime, there is the satisfaction of knowing that prices for this Fall and Winter are all based on the fabric-costs of a year ago.

We go on the principle that no merchant has a right to ask more than a fair profit on what he himself has paid. Makes no difference what the present market brings, although, as any woolen man will tell you, we could readily clean up a handsome profit on the woollens now in hand.

They're all-wool woollens too.

Everything men and boys wear.

U. S. CHEMISTS NOW MAKING BEST DYES

All Colors Available for Use by American Cloth Manufacturers.

EQUAL GERMAN PRODUCTS

New Processes Shown at the Chemical Exposition—25,000 Chemists to Attend.

The next time Mrs. Housewife, that you are charged twice as much as you paid in 1914 for a pair of gray gloves or a yard of green silk or a red frock for your little girl, on the plea that the "war has shut off importation from Germany and our manufacturers can't make dyes," just tell the person behind the counter to go to it! The next time your purple coat lining "comes off" on your white waist, hunt up the manufacturer and sue him. There is no dye that the American chemist cannot and does not make as well as the Germans ever made it. This is the good word that comes from the National Exposition of Chemical Industries, which opened yesterday at the Grand Central Palace and will continue till Saturday night.

"The chemists are on the job, and they have met the emergencies created by the war," said Dr. Charles F. Roth, secretary of the American Chemical Society, who opened the exposition. "Good dyes cost more, because some of the materials are demanded for use in high explosives. Some cloth manufacturers don't want to pay the price, so they palm off cheap dyes that 'run.' There

was one factory in New Jersey that ripped up the floor of its dyeing room, extracted the accumulation of dyes that had seeped through, and used them. I suppose the women who bought cloth turned out by that factory wondered why the blacks looked green, and all the colors streaked and queer, but of course they said, 'Oh, well, the war—and worse the cloth patriotically. Some cloth makers are using dyes they got from Germany before the war, and put aside as not good enough to use them.'"

Lack of financing, according to several of the speakers yesterday, has stood in the way of the expansion of chemistry in the United States. In order that big money and chemists may get together, a bankers' evening is planned Friday, when G. A. O'Reilly of the Irving National Bank will speak on "The Banker and the Chemist," and Arthur D. Little will talk on "The Chemist and the Banker."

But that American chemists are getting into the game is proved by the fact, stated yesterday at the exposition, that the companies incorporated within the last month to manufacture drugs, chemicals and dye stuffs represent a capital of over \$13,000,000.

Explosives From Coal Gas.

Dr. Charles H. Herty, former president of the American Chemical Society, declared in his speech that he "felt meat every time he lighted the gas." "The reason," he said, "is that gas contains toluene, and every trace of toluene should now be on its way to Europe in the form of high explosives. The chemists are ready and anxious to extract every bit of high explosive from our coal gas, and Heaven knows our boys will need it. They will need it to wait the word from those who have charge of the ammunition for our armies, and they will furnish enough toluene, extracted from the gas used by consumers in this country, to meet trench warfare and make our boys the winners."

Dr. Julius Steiglitz, president of the American Chemical Society, and Dr. G. L. Thompson, president of the American Institute of Chemical Engineers, spoke on the progress of chemical industries since the exposition last year. Motion pictures are shown every evening. About 25,000 chemists, from all parts of the United States and from

Canada, are in town to attend. The 400 exhibits cover everything from a common or garden variety of cork to a vacuum still that fills the rear of the Palace on the main floor from Forty-sixth to Forty-seventh street, and earns its living turning out enough antineals to put every salesman who tells you the war has shut off our supply of antineals right in the Ananias class.

FORD MOTOR CO. NET ASSETS \$133,604,907

Annual Statement Shows Cash on Hand \$45,130,390.

Special Dispatch to The Sun.

Detroit, Sept. 24.—The annual statement of the Ford Motor Company for the year ending July 31, 1917, filed with the Secretary of State to-day, shows the following figures:

ASSETS.

Real estate, used in its business, \$27,292,542.80.
Goods, chattels, merchandise and other tangible property, \$66,921,158.13.
Cash on hand, including deposits in banks, \$45,130,390.96.
Patent rights, copyrights, trademarks and formulas, nothing.
Good will, nothing.
Value of credits owing to corporation, \$1,490,687.10.
All other property, nothing.
Total, \$133,604,907.99.

LIABILITIES.

On real estate mortgages, nothing.
On chattel mortgages, nothing.
On all other secured indebtedness, nothing.
On all unsecured indebtedness, \$25,229,871.74.
Total, \$25,229,871.74.

Fined \$50 for Violating Sabbath.

Benjamin Goldstein, a shoe merchant of 335 Hudson street, acting upon the theory that the better the day the better the deed, offered to sell a pair of shoes to Policeman Flanagan of the Charles street station on Sunday. Magistrate Murphy fined Goldstein \$50 for violating the Sabbath law.

WAR LIBRARY DRIVE STARTS.

New York City Asked to Raise \$250,000 for Books for Soldiers.

The finance committee of the Greater New York Library War Council met yesterday in the office of Morgan J. O'Brien, 120 Liberty street, and planned details of a drive to raise \$250,000. New York City's part of the \$1,000,000 which this country is going to collect to provide books for the soldiers and sailors. James Speyer is chairman of the committee. Mr. O'Brien, chairman of the drive, is chairman of the finance committee, and Frederick H. Pratt of Irvington, George W. Perkins of The Bronx, H. G. Heyson of Queens and William H. G. Heyson of Richmond are the other members. Samuel A. Lowenthal is treasurer. Contributions may be sent to any branch of the Public Library or to the main library building on Fifth Avenue, to any newspaper or to Samuel A. Lowenthal, treasurer, at 61 Broadway. The cantonment library will circulate from 5,000 to 10,000 volumes a day.

Report Coastwise Shipping Bill.

WASHINGTON, Sept. 24.—The Administration bill to permit foreign ships to engage in American coastwise trade as a war measure was favorably reported today by the House Merchant Marine Committee with restrictions to protect the home industry and exclude Alaska from its provisions.

Why so many in the Metal Industries have installed THE DICTAPHONE

IT is simple—just as simple as adding two and two.

Dictaphones won't manufacture iron or brass ware—but they will take care of one-third more mail with the same office force.

The Dictaphone System saves costs and speeds up office work.

The ones mentioned here are just a few of the many in this line of industry.

Firms in this line have been rushed with orders, swamped with mail—short of help. That's why they use The Dictaphone.

If you don't yet realize why, it is because you have not yet learned all the facts.

Let The Dictaphone man take fifteen minutes of your time to tell you these facts.

An Increase in Price Goes into Effect October 1st

If you are a busy manufacturer you need The Dictaphone. Send for our helpful booklet, "The Man at the Desk"
